**Need:** Post it notes  
Pattern  
Pen  
Finger Nail Clippers

1) First Stick a post it onto the pattern sticky side towards the top, lining up the straight edge with the pattern.

2) Next, Take the pen and mark the vertical rows off

3) Next, Remove the Post it from the pattern and clip at the lines you marked with the finger nail clippers

4) Next, with all the lines, "Scored" Flip up every other one

5) Next clip the tabs off you flipped up, creating a comb.

6) Now you have a guide for easily reading your patterns

I normally make several per pattern to put above and below the first row to get me started.
